Re: Asbestos AHERA Information Report

This is the annual updated, compliance letter required by the Asbestos Hazard Emergency Response Act (AHERA). This act requires all school districts, public and private, grades K through 12, to inspect each of their school buildings for asbestos-containing materials. Management Plans have been developed outlining how asbestos-containing materials will be handled in each of the school buildings.

The Tiverton School Department is committed to remaining a safe and healthy environment for all children, employees, and guests in our schools. We will continue, as we have in the past, to monitor, inspect, and repair any asbestos containing materials. Copies of our Management Plan and Inspection Reports are available upon request for review at each school office, as well as the Office of Administration, located at 100 North Brayton Road, Tiverton, RI.

We intend to have our Asbestos Operations and Maintenance Program updated every six (6) months and shall notify occupants, in advance, if abatement will be performed within your school building. Unless an emergency arises, all asbestos abatement will be performed during the weekend or school holiday period.

We have contracted John Carbone of Vortex Inc. Environmental Management, Consulting, and Training Services as our professional asbestos consultant. If you would like more information regarding the AHERA Program, you may contact my office at (401) 624-8475.
